2nd-3rd December 2019

Pain Treatment RF / CRYO

INVITATION

www.arkana-forum.com

Dear Colleagues and Friends,

We are pleased to announce the programme of the international course and workshop „Minimally invasive pain treatment“ taking place 2nd-3rd December 2019 in Emmendingen and Karlsbad-Langensteinbach.

This course once more emphasizes the significance of cryoanalgesia and (Pulsed) RadioFrequency Treatment in treating degenerative spinal dorsal pain as well as other procedures like denervation of various joints, facial pain, inflammatory diseases or sympathetic nerve treatment.

By means of standardized methods in the application of temperature controlled techniques, both RF thermolesion and cryoanalgesia, pain treatment is supplemented by two useful and effective methods.

An experienced team of application specialists will offer an overview on the methods and during integrated hands-on sessions you will have the opportunity to get familiar with them.

The theoretical knowledge gained can be expanded in practical hands-on sessions offered in the course and during CT guided live demonstrations.

Take the chance to share and discuss your experience with participants and speakers. We cordially invite you to join us and are very much looking forward to welcoming you in this course.

Sincerely

Dirk Rasche MD
