DETAILS

COURSE DIRECTOR

Sam Van Slycke, MD, PhD, FEBS, Endocrine

WHAT YOU WILL LEARN

- cLONM basics with regard to technology, application and recent innovations
- mechanisms / causes of function-related signal changes; differentiation between true loss-of-signal and artefacts
- anaesthesiological aspects of cLONM
- tips and tricks for particular patients or operative situations
- cLONM system set-up in the OR; tips and tricks for the preparation of thyroid surgeries
- optimal placing of breathing tube and electrodes; optimal nerve stimulation
- intermittent and continuous stimulation of Vagus, RLN and SLN
- ... and much more!

VIDEO TUTORIALS

To ensure the best learning experience for the course participants, pre-course video tutorial learning is mandatory before visiting the operating room. Completion of the tutorials (total: ca. 2 hours) will be monitored and some quiz questions will be asked.
